

Good ???? L&G. I wonder if anyone can tell what this familiar shape is.... Yes Sir... a map of ???? (Great Britain or your nation/region). So where do we regularly see this? In an Atlas ... true! Where else? .... Absolutely.... If you didn't hear that he said the Weather.....

**FORECAST**

Forecast. We see Ian McGaskil, Susan Charlton and "John Ketley is a weather man and so is Michael Fish" (change names as appropriate). Morning and Evening they say there is a 20% chance of ....

Sun shape (in red around a yellow circle)

Good News! or a 50% chance of this...

Storm shape (in black around a yellow flash)

Bad news! And, of course, we know thee is a 95% chance that they are completely WRONG! Now if we're going out for the day we don't want to meet this ugly guy....

**STORM**

In October 1989 Southern England went off into a peaceful sleep having been told tomorrow would bring "sunshine & showers" (in weather man's lingo that means, "I'm sorry I haven't a clue!"). They woke to find 7 million trees leaning on their cars and conservatories. There are other kinds of storm. Anne Diamond (famous for presenting TVAM) in June 1991 her son Supi, who at the time was 18months old, suddenly died of a cot death. "There was no warning", she said, "no alarm bells that anything was wrong.". Facts like this can make us feel....

**FEAR**

That's right. Fear. In the Caribbean they fear hurricanes. Down in Africa they fear famine. The common link is that they realise how fragile human life can be. back in the UK we fool ourselves and we gamble with our safety. Every year 20,000 people die on the roads and 30,000 from lung disease.... But we keep driving and some keep puffing away. The world's best seller say, "We shall reap what we sow." ... but do we take any notice. Eat drink and be merry ... how does it end? At least tomorrow never comes eh?

What we need is a bit of my next word. In fact, Madonna, years ago, once explained her outrageous behaviour by revealing that she lacked this ....

**SECURITY**

Security. No I'm not selling alarm systems! After all we all know security is an inside job. Scientists tell us that on the surface of the Sun there are strange cold areas

. (draw small blob on sun)

When they appear they can effect our weather or tides. Even in the sunny areas of our life there are small indications (keep adding sunspots) that spell impending doom. Slowly these accumulate and ... if we don't get on our knees and sort them out .... soon they will crack us open....

----- (horizontal of cross)

Now there's one person who knows all your hidden secrets. He even knows the number of hairs on your head .... and He loves YOU! He loves you and doesn't want to allow you to let your secret sins destroy all your dreams. He made you and knows how to put things right.... and was prepared to pay!! You see God mounted a rescue plan and became a man who took the name "RESCUE" (Jesus means rescue). He had a stormy life, but did not fear because he had perfect security. But he then gave us his security and let us kill him, in order to buy us back.....etc

PREACH ..... cross .... **+**

You see God loves you and he has a good forecast for your life and your eternity if you will only...

**TURN**

Turn from your sin... both the seen and the unseen... and give your life back to the one who loves you and knows you. I have a leaflet etc
